EDUCATION

Universiteit Van Amsterdam
Data Science and Business Analytics Master
GPA = 8.6
2024 - Current

Universiteit Van Amsterdam
Business Analytics Bachelor
GPA = 8.27 - Cum Laude
2021 - 2024

COMPUTER SKILLS

- Python
- SQL
- Tableau
- Microsoft Office
- R
- dbt
- GCP (Google Cloud Platform)
- Terraform

LANGUAGES

- English
- Italian
- French
- Spanish

I love all things data, especially LLMs, AI, and anything that automates and makes life easier. Just finished a Master's in Data Science and Business Analytics at the University of Amsterdam, with hands-on experience in business intelligence, data engineering, machine learning, and RAG LLM frameworks. In my free time, I love reading, bouldering, meditating and playing board games, and of course travelling.

EXPERIENCE

BUSINESS INTELLIGENCE

YOKOY - TRAVELPERK

June 2024 - Current

Role description

Main focus on:

- Working as part of the cross-functional **Business Intelligence** team, supporting multiple departments with a particular focus on Marketing and HR
- Maintaining and developing data pipelines using **dbt** and **PostgreSQL**, ensuring efficient data transformation and integration.
- Optimising data workflows to improve reliability, scalability, and performance in **dbt**
- Designing, building, and maintaining reports and interactive dashboards in **Tableau**
- Creating and maintaining comprehensive **documentation** for data models, pipelines, and **dashboards** to ensure transparency and knowledge sharing

DATA ENGINEER INTERNSHIP

INGKA (IKEA DIGITAL)

Sep 2023 - June 2024

Role description

Worked as part of the Customer DataTeam on multiple projects:

- **dbt - BigQuery** setup (using **Terraform**, **GCP**, **CI/CD**, **YAML**, **Docker**)
- Designed and implemented an **LLM-powered RAG** model using **Python** to handle inquiries about **GCP** tables. The model can interpret natural language questions, provide insights into table contents, and generate **SQL** queries for data retrieval. Integrated into **Slack** for seamless and intuitive user interaction.
- Retrieved and processed data using dbt and **BigQuery**, supporting efficient model creation and analytics.
- Developed a **SQL linting** script utilizing **SQLFluff**, automating code formatting and improving interpretability through terminal commands.
- Worked with various Google components, including **Firestore**, **Vertex AI**, and **Generative Studio AI**

JUNIOR DATA ENGINEER

KR&A

Real Estate DataAnalysis FinTech Start-Up

Oct 2021 - Jan 2023

Role description

Supporting decision-making, providing insights and up-to-date data in the Real Estate sector. Main tasks:

- Data Collection/Preparation
 - **Web Scraping with Python** using **Scrapy**, **Selenium** and **BeautifulSoup** (also on dynamic websites)
- Data Processing/Analysis
 - Analysed complex, high-volume, high-dimensionality data from varying sources using **Python** and **SQL**
 - Identified and evaluated the quality of different data sources
- Data Visualisation
 - Utilised dashboards to communicate metrics using **PowerBI**

TUTOR

2020 - 2023

- Maths
